Professional Summary

Pharmacy graduate (B.Pharm) who moved into MIS and automation, building technical skills on the job. MIS Executive with experience automating reporting, quality and operations workflows using Google Sheets, Apps Script, Python and SQL. Replaced manual spreadsheet work with scheduled, formula-driven systems that cut hours of effort into minutes. Received the Best Performer R&R Award for automating the daily update of 20-22 process review sheets.

Experience

MIS Executive, CarTrade Tech (CarWale) | Feb 2026 - Present

Consultant, CarTrade Tech (CarWale) | Feb 2025 - Feb 2026

- Automated 20-22 process review sheets using IMPORTRANGE, VLOOKUP and pivots over centralized raw data, turning a weekly, full-day manual task into a daily update of about 30 minutes. Earned the Best Performer R&R Award.
- Built the Daily Quality Report system in Google Sheets and Apps Script: 10 consultant-wise reports, 1 process-wise report and 1 bot report sent daily, with recipients picked from a mapping sheet. Replaced a manual 20-minute daily process.
- Built a Workforce Tracker as a Windows desktop application (Python, PyInstaller, FastAPI, MySQL) at zero cost to the company. Agents log breaks, meetings and training with one click, giving managers and TLs visibility into productive time for the first time.
- Built a Weekly Top Performer PDF generator (.exe) with formula-based winner selection, reducing 1-1.5 hours of weekly work to 5 minutes.
- Cut Team Leader reporting time for Bajaj Chetak/KTM (35-40 minutes to 5 minutes) and TVS retail (1 hour to 5 minutes) using centralized sheets and scripts.
- Consolidated 22 QA spreadsheets into one Supreme file using a single formula, extending data history from 1 month to 1 year.
- Automated RT deficit reporting: previous-day and MTD shortfalls, a team-wise summary email, and individual emails to consultants with TLs in CC.

- Developed Apps Script web apps for Team Leaders: a Leave Roster Change Request app (auto-maps the manager, updates the tracker, sends confirmation) and a Consultant Impact Tracker.
- Built a WhatsApp reminder script that flags Team Leaders who have not updated RT goals, at zero third-party software cost.
- Also automated dealer-wise performance emails by ASM, break-exceed alerts, Ozonetel/Ameyo/Exotel data and report downloads, BikeWale lead-to-retail consolidation and JLR lead transfer.
- Automated multi-process deck data preparation, reducing about one day of work to 15-20 minutes.
- Automated ASM-wise email distribution, reducing 3-4 hours of manual work to 5-10 seconds.
- Automated Hero model-wise lead and retail MTD reporting for Team Leaders, cutting 4-5 hours of manual calculation to 5 minutes.

Pharmacist, JJ Hospital | Aug 2023 - Nov 2024

Consultant (Dialer), Hexaware | Sep 2022 - Jul 2023

Skills

Spreadsheets: Google Sheets (QUERY, FILTER, ARRAYFORMULA, VLOOKUP, IMPORTRANGE, pivot tables), Excel

Automation: Google Apps Script, Python, Gmail automation, scheduled triggers

Data and backend: SQL, MySQL, FastAPI, Amazon QuickSight

Currently Building

AI agent for email, file and browser tasks.

Education

Bachelor of Pharmacy (B.Pharm), MGU College of Pharmacy | 2026

Diploma in Pharmacy (D.Pharm) | [College and year]
